Bamboo Cutting Boards

Bamboo is actually a grass that grows to it's full height in a single growing season. Each plant can be harvested every year making it 100% renewable. Bamboo is harder and denser than most hard woods, making it ideal for cutting boards. We use only premium grade Bamboo and food grade glues. Bamboo should be hand washed and never put in a dishwasher.

\$7.00 Speculative Sample Offer

Show your client what their logo looks like on an actual sample on any Bamboo Cutting Board. \$7.00 net per sample, must be customer logo, no personalization and you must supply your shipper number for freight.
