RE: Proposition 65 Compliance.

Dear Valued Customer:

As you may know, the Safe Drinking Water and Toxic Enforcement Act of 1986, commonly referred to as Proposition 65, requires any business that sells products in California to provide warnings if the product may expose a person to certain chemicals listed in California as known to cause cancer, birth defects or other reproductive harm. The requirements apply to manufacturers, distributors and retailers.

We want you to know that our company takes its compliance with Proposition 65 very seriously. We work closely with the manufacturers of our products to determine whether or not a listed chemical is in the product. We also conduct our own independent testing of certain products. When necessary, we place a warning on the product or product packaging before it is shipped to our customers.

Based on our due diligence efforts, we have determined that the product(s) sold to you Y6875 TEXTURED POLY DUCK 2PU 58/60 does not require a Proposition 65 warning. If you have any questions or concerns, please contact your assigned sales representative.
