Enduro Apparel — Stay cool when it's hot. Stay warm when it's cold. Stay fresh all day.

MEET YOUR GO-TO SHIRT!

Tired of performance shirts that promise to keep you dry but leave you soaked? Enduro Apparel is designed to work the moment you start to sweat. Our proprietary dual-layer fabric pulls moisture away from your skin and spreads it across the outer surface, where it evaporates quickly to help keep you cool, dry, and comfortable.

Whether you're running, hiking, biking, working outdoors, hitting the gym, or enjoying a festival, Enduro helps regulate temperature in both hot and cold conditions. Unlike chemical treatments that wash out over time, Enduro's moisture-management properties are built directly into the fabric for lasting performance.

The result? Less cling, greater comfort, UV protection, and a daisy fresh feel throughout the day. Finished with our signature embroidered Hummingbird Daisy logo, every Enduro shirt is made for people who demand hummingbird endurance and performance wherever life takes them.

In cold weather it keeps you warm because it dries from the inside out better than wool and itch-free.

Small, Medium, Large, XL, 2XL, 3XL

NEW ARRIVAL

No chemical treatments.
