PAM'S TIPS

*Your customer needs a **table cover**, but because they don't provide their own table, they don't know if they will be provided a **6' or an 8' table**. You have a **solution**!*

NO: Don't recommend that they buy an 8' table cover. If they end up with a 6' table, they will have 1' of fabric on the floor on each end. Both unsightly and dangerous.

Side View on the 2 end sections of table cover

YES: Advise that they select a 6' table cover OR a convertible table cover. If they have the 6' cover and end up with an 8' table, they will still have full coverage on the front, top and back (with 4 sided option), and the cover will simply come up off the floor 1' on each end! The Convertible table cover will fit either size table.

OPTION: Convertible Table Cover: #CBTTFC8- All over custom color / imprint dye-sublimated cover. #CBTTC8- Screen printed table cover. A convertible table cover fits like a flat / draped cover on the 8' table and like a fitted cover on a 6' table by converting with hook and loop closures.

OPTION: 6' table cover with full coverage or open back. From 1/c, 1/L imprint to full color dye sublimated.
